Thanks Matt - we definitely need to get on top of this one - it didn't go well last time on a lot of fronts.

Also, FYI I received a notice today from the Corps that Ash Grove is has applied for a permit to dredge (near RM 10) .

Industrial Slip Dredging
Notification

Chip and Eric,

I wanted to make you aware that Schnitzer, apparently, has plans to conduct additional maintenance dredging in the international slip starting September 20th. Jim Orr, the DEQ project manager, is out this week. So, I do not know much beyond what is in Jim's e-mail below.

Matt McClincy

Notification

Hi Jim.

I'm not sure how to access the ftp site, but I looked up the history on this for 401...

This one was before my time... Looks like a Corps permit and 401 were issued in 2004 (expire in Feb 2009). I am attaching it so you can see the conditions and the required BMPs. Not sure what is in the sediment, but these BMPs would not be adequate for some stuff nowadays... Also, they are required to evaluate the sediment before dredging (the DMEF is outdated, it is the SEF now). I have copied the Corps project manager (who will forward this to the current one if necessary?) and also Genet who reviews submitted sampling and analysis for DEQ through the SEF, so you can follow up with them directly. Genet, can you let us know if the PRG has looked at this? Thanks.

Notification

Matt Woltman of Floyd and Snider DEQ gave notice of Schnitzer Burgard's plans to dredge the industrial slip starting September 20, 2008.

I will post several documents on our FTP site and at V:\Jim Orr's Projects\2355 Schnitzer Burgard\Dredge file.

Thanks, Jim Orr
